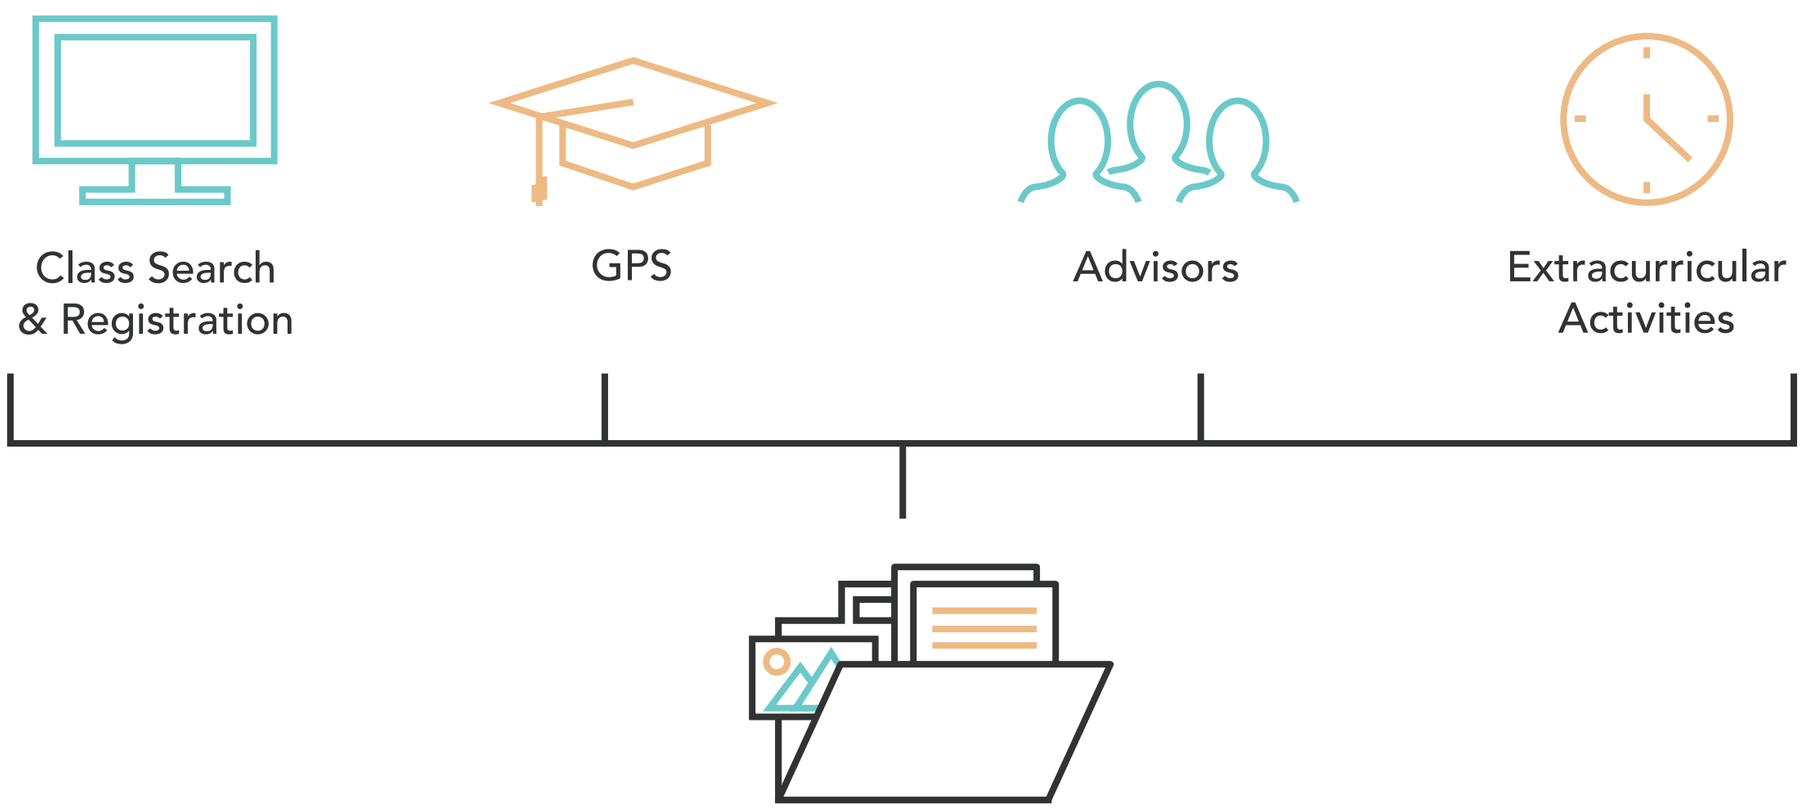
TAKING BACK CONTROL

By **packaging various tools** used by students to plan their college careers and their futures, **errors in communication** between the systems are **greatly reduced**.

Students can search and register for classes through a cohesive and intuitive system designed with their needs in mind.

By integrating advisor scheduling, they have a direct line to campus resources that are available to help them.

Extracurricular activities fitting each student's unique interests are now incredibly easy to find, as *Hub* utilizes a tagging system built to find groups that share similarities with the student's classes.



Through an updated ePortfolio feature, students are able to digitize their unique experiences. A powerful tool that showcases their knowledge and skills, a portfolio makes students competitive candidates in their fields of study.

VISUALIZING THE EXPERIENCE

Who am I as a student? The task of laying out one student's body of work spanning four years shows the individuality and unique skills each graduate brings to the table—and how much doesn't fit on a resume.
